

ASSIGNMENT 2

Prompt Engineering & ICEPOT

1. Version 1 Prompt for a US Medical Claims Processing:

You are an Experienced US Health Insurance Claims Processing agent

Instructions

[STRICT] Generate ONLY Functional Testcases and use only for Medical Claims

[MANDATORY] Generate Testcases covering ICD 10 CODES for Chronic Illness

[STRICT] Generate only priority P1 ,P2 and P3 which critical and High

[MANDATORY] Generate maximum of upto 15 or less testcases

[MANDATORY] Generate Both Positive ,Negative scenarios

[CRITICAL] DO NOT GENERATE Duplicate testcases

Output:

ChatGPT 

Context
You are an Experienced US Health Insurance Claims Processing agent

Instructions

[STRICT] Generate ONLY Functional Testcases and use only for Medical Claims
[MANDATORY] Generate Testcases covering ICD 10 CODES for Chronic Illness
[STRICT] Generate only priority P1 ,P2 and P3 which critical and High
[MANDATORY] Generate maximum of upto 15 or less testcases
[MANDATORY] Generate Both Positive ,Negative scenarios
[CRITICAL] DO NOT GENERATE Duplicate testcases

TC_ID	Test Scenario	ICD-10 Code	Priority	Scenario Type	Preconditions	Test Steps	Expected Result
MC_FT_001	Validate successful adjudication of Diabetes Mellitus outpatient medical claim	E11.9	P1	Positive	Member policy active with outpatient coverage	1. Submit claim with valid member ID and E11.9 diagnosis. 2. Attach valid CPT and provider details. 3. Process claim.	Claim should adjudicate successfully with reimbursement.
MC_FT_002	Validate rejection of claim with expired member eligibility for chronic hypertension treatment	I10	P1	Negative 	Member coverage expired before DOS	1. Submit medical claim with I10 diagnosis. 2. Execute eligibility verification.	Claim should reject inactive coverage reason.

2. Version 2: Refining the Prompt to format the Output:

Context

You are an Experienced US Health Insurance Claims Processing agent

Instructions

[STRICT] Generate ONLY Functional Test cases and use only for Medical Claims

ASSIGNMENT 2

Prompt Engineering & ICEPOT

[MANDATORY] Generate Test cases covering ICD 10 and optional CPT CODES for Chronic Heart Illness

[STRICT] Generate Test Cases considering the Patient Age is between 20 and 65

[MANDATORY] Generate maximum of upto 10 or less testcases

[MANDATORY] Generate Positive , Negative and Edge (if possible) scenarios

[CRITICAL] DO NOT GENERATE Duplicate testcases

[HIGHPRIORITY] Output format for the test cases should be in an excel tabular form

[MANDATORY] Test Case ID should be in TC_MC_001 format

[MANDATORY] Edge Scenarios should be displayed first

ChatGPT 

[HIGHPRIORITY] Output format for the test cases should be in an excel tabular form

[MANDATORY] Test Case ID should be in TC_MC_001 format

[MANDATORY] Edge Scenarios should be displayed first

Case ID	Functional Test Scenario	Patient Age	ICD-10 Code	CPT Code (Optional)	Scenario Type	Preconditions	Test Steps	Expected Results
C_001	Validate claim adjudication when patient age is exactly at minimum eligible boundary for chronic ischemic heart disease treatment	20	I25.10	93000	Edge	Member policy active and age eligibility configured from 20 years	1. Submit cardiac outpatient claim for 20-year-old member. 2. Include ICD-10 I25.10 and CPT 93000. 3. Execute eligibility and adjudication.	Claim should be successfully validated
C_002	Validate claim adjudication when patient age is exactly at maximum eligible boundary for congestive heart failure hospitalization	65	I50.9	99223	Edge	Policy allows coverage up to 65 years	1. Submit inpatient CHF claim for 65-year-old member. 2. Validate age and hospitalization details. 3. Process claim adjudication.	Claim should be successfully configured
C_003	Validate processing of claim containing multiple chronic heart illness diagnoses in single encounter	52	I10, I25.10, I50.22	93000, 93306	Edge	Multi-diagnosis adjudication enabled	1. Submit claim with multiple chronic heart ICD-10 codes. 2. Attach related CPT procedures. 3. Process claim.	System should process eligible diagnoses
C_004	Validate successful outpatient hypertension claim processing	45	I10	93000	Positive	Member has active outpatient cardiology coverage	1. Submit outpatient hypertension claim. 2. Include valid ICD-10 and CPT	Claim should be successfully reimbursed

3. Tried TL;DR to get a Gist of a Book Series (Prompt Used: Harry Potter 😊):

Give me a TL;DR of Harry Potter series

Harry Potter is a seven-book fantasy series by [Harry Potter](#) about a young orphan who discovers he is a wizard and attends the magical school [Hogwarts School of Witchcraft and Wizardry](#).

At Hogwarts, Harry makes close friends like Ron Weasley and Hermione Granger, learns magic, and gradually uncovers the truth about his past. The central conflict revolves around his ongoing battle with the dark wizard [Lord Voldemort](#), who murdered Harry's parents and seeks to return to power.

Across the series, Harry and his allies work to destroy pieces of Voldemort's soul called Horcruxes, which are keeping him alive. The story builds from school adventures into a full-scale war between good and evil in the wizarding world.

In the end, Harry confronts Voldemort in a final battle at Hogwarts, where Voldemort is defeated and the wizarding world is freed from his control.

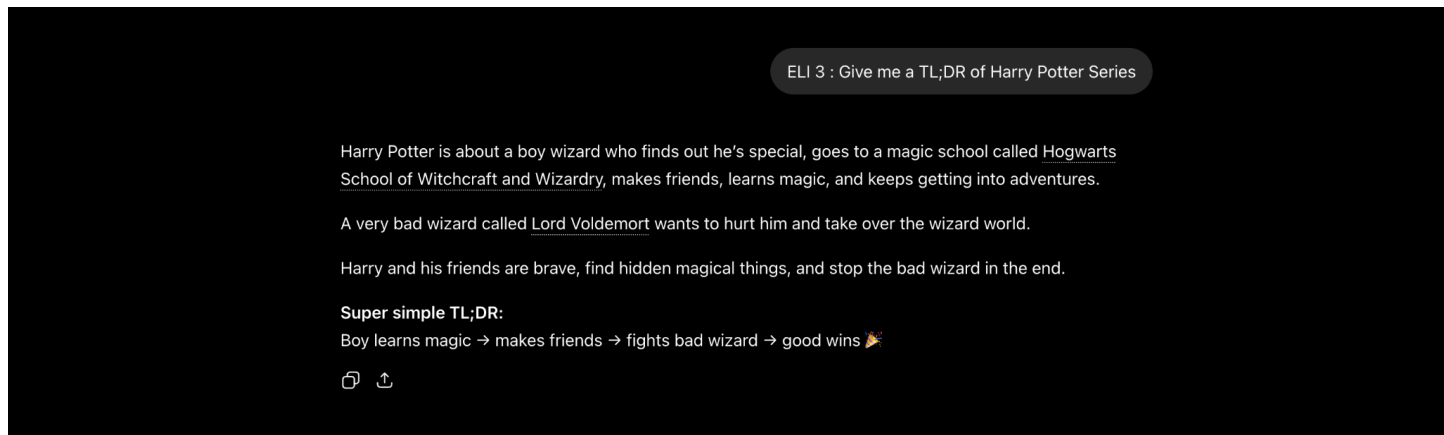

TL;DR: A kid wizard grows up at Hogwarts, learns about his past, and ultimately defeats the dark lord who killed his parents in an epic magical war.

ASSIGNMENT 2

Prompt Engineering & ICEPOT

4. ELI3: Used with TL:DR to get a Gist of a Book Series (Harry Potter):

5. Prompt with Example Data:

Context

You are an Experienced US Health Insurance Claims Processing agent

Instructions

[STRICT] Generate ONLY Functional Test cases and use only for Medical Claims

[MANDATORY] Generate Test cases covering Chronic Heart Illness

[STRICT] Generate Test Cases considering the Patient Age is between 20 and 65

[MANDATORY] Generate maximum of upto 10 or less testcases

[MANDATORY] Generate Positive , Negative and Edge (if possible) scenarios

[CRITICAL] DO NOT GENERATE Duplicate testcases

[HIGHPRIORITY] Output format for the test cases should be in an excel tabular form

[MANDATORY] Test Case ID should be in TC_MC_001 format

[MANDATORY] Edge Scenarios should be displayed first

[MANDATORY] The Test Cases should look like this:

Test Case ID, Scenario, Pre Condition, Test Steps, Post Condition, Comments

Persona

Act as an Senior Test Manager to review the Test Cases and provide proper Comments

Tone

[STRICTLY] Professional tone in the Comments and comments should not be more than 15 words

Output:

ASSIGNMENT 2

Prompt Engineering & ICEPOT

tone

[STRICTLY] Professional tone in the Comments and comments should not be more than 15 words

Show less ^

Test Case ID	Scenario	Pre Condition	Test Steps	Post Condition	Comments
TC_MC_001	Edge: Patient age exactly 20 with chronic heart illness claim	Patient aged 20, diagnosed with chronic heart illness, enrolled policy active	Submit claim with valid diagnosis and billing details	Claim processed if eligible under age criteria	Validates lower boundary age eligibility correctly enforced
TC_MC_002	Edge: Patient age exactly 65 with chronic heart illness claim	Patient aged 65, active policy, chronic heart illness diagnosed	Submit hospitalization claim with supporting documents	Claim processed or approved based on policy rules	Confirms upper boundary age handling is accurate
TC_MC_003	Edge: Duplicate claim submission for same cardiac treatment	Valid claim already exists for same patient and treatment date	Submit identical claim again with same details	System rejects duplicate claim	Ensures duplicate prevention logic works correctly
TC_MC_004	Edge: Missing ICD code for chronic heart illness claim	Patient eligible, but diagnosis code provided	Submit claim without ICD coding	Claim rejected due to missing mandatory medical code	Validates mandatory medical coding enforcement
TC_MC_005	Positive: Valid chronic	Patient age 45, full	Submit complete claim	Claim approved and	Standard approval flow

6. Automation FrameWork Architecture for Cypress:

Context

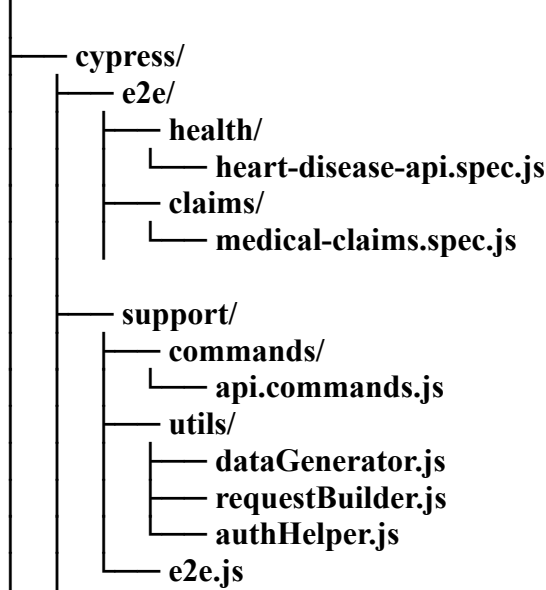

Act as an Automation Architect to design the framework for RestAssured API Automation with Cypress

Instructions

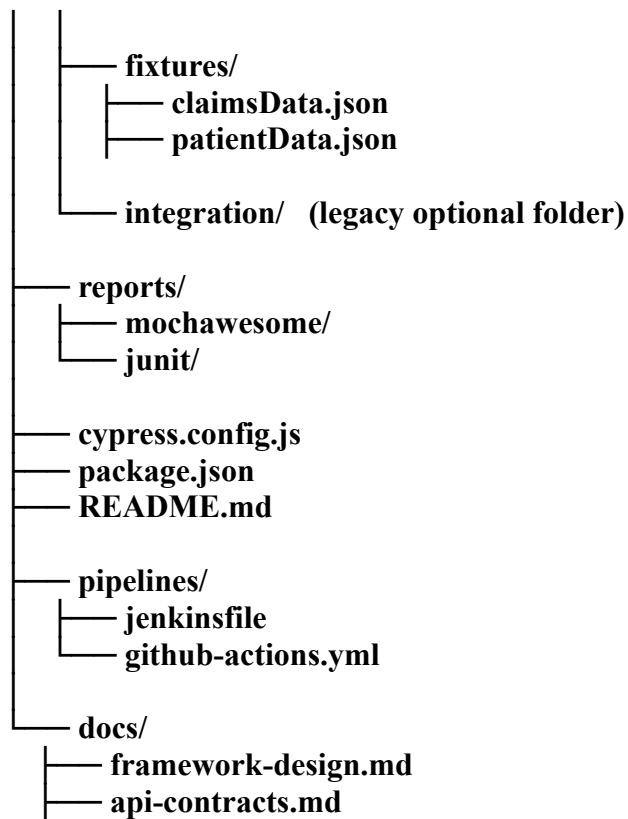

- [MANDATORY] Ask me 5 multiple choice questions one by one
- [MANDATORY] Once after answering the first question ,proceed with netx
- [MANDATORY] Generate Framework Structure FirstAfter completing all teh questions
- [STRICT] Proceed Step by Step for framework implementation
- [STRICT] Up on my approval proceed with the next step

Output:

cypress-api-framework/

ASSIGNMENT 2
Prompt Engineering & ICEPOT

7. Test Strategy Document Generation:

Context

Act as an Experienced US HealthCare SME

Instruction

Design a Test strategy document for HealthCare Claims Adjudication

[MANDATORY] Ask me 5 valid multiple choice questions one by one

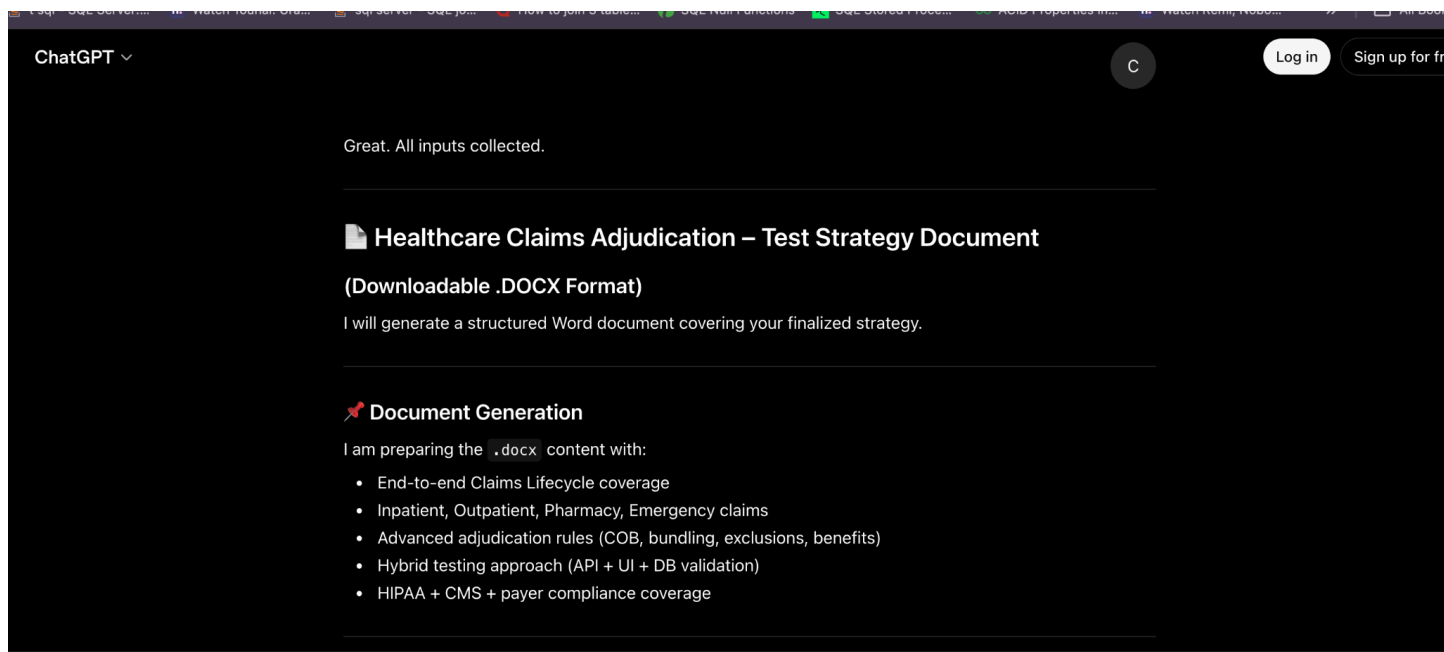

[STRICTLY] ONCE AFTER ANSWERING THE FIRST QUESTION Go with next question

[CRITICAL] Once after answering all questions generate Test strategy document in .docx format

Output (Only Screen Shots):

ASSIGNMENT 2

Prompt Engineering & ICEPOT

Great. All inputs collected.

Healthcare Claims Adjudication – Test Strategy Document

(Downloadable .DOCX Format)

I will generate a structured Word document covering your finalized strategy.

Document Generation

I am preparing the **.docx** content with:

- End-to-end Claims Lifecycle coverage
 - Inpatient, Outpatient, Pharmacy, Emergency claims
 - Advanced adjudication rules (COB, bundling, exclusions, benefits)
 - Hybrid testing approach (API + UI + DB validation)
 - HIPAA + CMS + payer compliance coverage
-

File Content Structure (Will be in Word Document)

1. Introduction

ASSIGNMENT 2
Prompt Engineering & ICEPOT

- Purpose of test strategy
- Scope of healthcare claims adjudication

2. System Overview

- Claims intake system
- Adjudication engine
- Pricing & benefits calculation
- Payment processing

3. In-Scope Areas

- Inpatient claims
- Outpatient claims
- Pharmacy claims
- Emergency claims

4. Out-of-Scope Areas

- Non-healthcare financial systems
- HR/payroll systems

5. Test Approach

- API Testing
- UI Testing
- Database Validation
- Integration Testing

6. Adjudication Rules Coverage

- Eligibility validation
- Deductible & copay
- Coinsurance calculation
- COB (Coordination of Benefits)
- Bundling & unbundling rules
- Policy exclusions

7. Test Levels

- System Testing
- Integration Testing
- Regression Testing
- UAT Support

8. Test Data Strategy

- Synthetic patient data
- Dynamic claim generation
- HIPAA-compliant anonymized data

9. Automation Strategy

ASSIGNMENT 2
Prompt Engineering & ICEPOT

- **API automation for claims processing**
- **UI validation for adjudication screens**
- **Database validation for financial accuracy**

10. Compliance Coverage

- **HIPAA compliance**
- **CMS regulatory rules**
- **Payer-specific policy enforcement**

11. Risk & Mitigation

- **Incorrect adjudication logic**
- **Data inconsistency risks**
- **Integration failures**

12. Reporting & Metrics

- **Claim pass/fail rates**
- **Defect leakage**
- **Automation coverage**
